## Extendible Truck Loader

**Two Piece Truck Loader for Loading Parcels onto Freight Trailers**

**Easy Maneuverability:** The 18 inch diameter six ply pneumatic foam filled tires provide easy movement in and out of freight trailers. This allows maneuverability over dock boards and door openings that incline or decline and maintain adequate product flow.

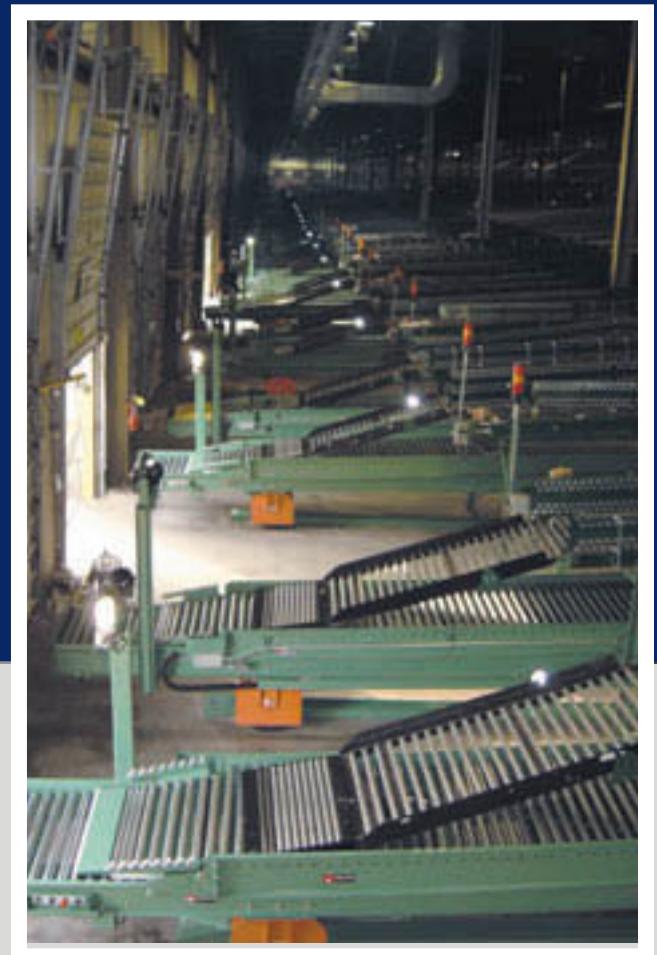

**Compensates for Trailer**

**Misalignment with the Dock Door:**

The steering wheels are located on the discharge end extending into the freight trailer which allows the operator to compensate for some trailer misalignment with shipping door.

**Rugged Construction:** The Extendible Telescoping Conveyor is built to withstand punishment in shipping areas that have a high degree of forklift traffic or other collision obstacles.

**Virtually Maintenance Free:** The two-piece conveyor is constructed of a 10 inch structural steel channel framework with very few moving parts. Thus suppling your business years of virtually maintenance free operation.

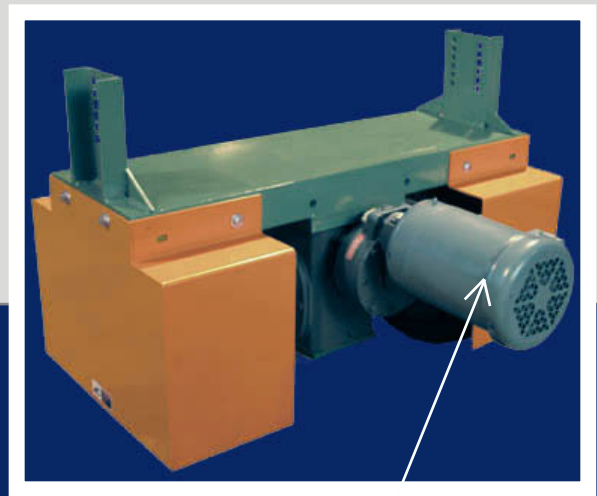

**The Truck Loader used by major DC facilities like Wal-Mart, Lowes, and Toys-R-Us.**

**Phone: (972) 323-0797**

**Fax: (972) 323- 0785**
